SKILLS

- **Programming Languages:** Python, Java, JavaScript/TypeScript, SQL
- **Data Science & AI:** TensorFlow, PyTorch, Scikit-Learn, Pandas, NLP, FAISS, LangChain, Groq LPU, RAG
- **Frameworks & Libraries:** React, Next.js, Node.js, Express, HTML, CSS, Tailwind CSS, Flutter
- **Database & Cloud:** AWS, Docker, Redis, Supabase, MySQL, MongoDB
- **Core Competencies:** System Architecture, REST APIs, Data Structures, Caching, Explainable AI (XAI)

WORK EXPERIENCE

nexvest.in | [Software Engineer](#)

Apr 2026 – Present

- Architected a high-performance investment analysis platform using Next.js and Supabase, enabling real-time stock evaluation and achieving a 99.9% uptime for 500+ active users.
- Optimized database queries and implemented backend caching strategies, successfully reducing data retrieval latency by 40% and accelerating feature delivery timelines by 25%.

Salahkaar Consultants | [Software Developer Intern](#)

Dec 2022 – Apr 2023

- Developed and integrated critical components of an Employee Management System utilizing Python and Node.js, streamlining human resource operations and saving 15+ hours weekly for 200+ employees.

PROJECTS & RESEARCH

- **Autonomous AI Control Plane** | Python, Docker, Pandas, Streamlit
 - **Live:** <https://autonomous-ai-control-plane.up.railway.app/>
 - Engineered a self-healing microservice simulator with predictive scaling algorithms, autonomously managing queue capacities and reducing simulated infrastructure downtime by 99%.
 - Decoupled backend ML workers and frontend dashboards via a Redis in-memory data store, mirroring production boundaries and successfully handling 10,000+ simulated concurrent requests with sub-10ms latency.
- **Academic Intelligence Assistant** | Python, Streamlit, Groq LPUs, FAISS, LangChain
 - **Live:** <https://academicchatbotumang.streamlit.app/>
 - Architected an agentic, RAG-powered academic assistant featuring a custom intent router and hybrid FAISS/Web-search retrieval, achieving a 95% reduction in hallucination rates.
 - Implemented dynamic API endpoint discovery for Groq's LPU inference engine, automating model selection (Llama 3) and achieving <800ms time-to-first-token (TTFT) for complex semantic queries.
- **High-Performance Engineering Portfolio** | Next.js 15, TypeScript, Tailwind CSS, Framer Motion
 - **Live:** <https://umangadesara.com>
 - Built a responsive, edge-deployed developer portfolio using Next.js 15 App Router and TypeScript, optimized for high performance and global delivery via Cloudflare Pages.
 - Integrated a custom "System Fit Analyzer" algorithm that parses recruiter job descriptions to instantly calculate technical alignment with my full-stack engineering skill set.

EDUCATION

Christ (Deemed to be University), Bengaluru | [MSc. in Data Science](#)

2023 – 2026

Symbiosis Institute of Computer Studies and Research, Pune | [B.C.A.](#)

2020 – 2023

CERTIFICATIONS

Full Stack Web Development (100xDevs); Introduction to AI (NPTEL); Introduction to Deep Learning; Introduction to NLP; Introduction to OpenAI GPT Models; Linear Algebra using Python; Introduction to Unix.
