PROFESSIONAL SUMMARY

Software and AI Engineer completing an MSc in Data Science, specializing in high-performance web applications and agentic AI systems. Experienced in deploying RAG architectures, optimizing backend latency by up to 40%, and building scalable machine learning models using Python and Next.js.

SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, SQL

Data Science & AI: Machine Learning, Deep Learning, TensorFlow, PyTorch, scikit-Learn, Pandas, NLP, FAISS, LangChain, Groq LPU, RAG, Explainable AI (XAI)

Frameworks & Libraries: React, Next.js, Node.js, Express, Streamlit, HTML, CSS, Tailwind CSS, Flutter

Database & Cloud: AWS, Docker, Cloudflare Pages, Redis, Supabase, MySQL, MongoDB

Core Competencies: System Architecture, REST APIs, CI/CD, Agile Methodologies, System Design, Distributed Caching, Git, GitHub, Data Structures & Algorithms

WORK EXPERIENCE

nexvest.in | [Software Engineer \(Remote\)](#) | Apr 2025 – Dec 2025

- Contributed to architecting a scalable investment analysis platform using Next.js and Supabase, achieving 99.9% uptime for a user base of 500+ daily active traders.
- Engineered backend caching strategies and optimized complex database queries, successfully reducing data retrieval latency by 40% and accelerating feature deployment cycles by 25%.

Salahkaar Consultants | [Software Engineer Intern](#) | Dec 2022 – Apr 2023

- Developed and integrated critical API components for an enterprise Employee Management System using Python, Java, and Node.js, building secure employee sign-in and core HR management workflows.
- Automated employee sign-in and daily HR management workflows using Python and Java, eliminating manual data entry bottlenecks to save 15+ hours weekly across a 200+ employee organization.

PROJECTS & RESEARCH

Autonomous AI Control Plane | Skills: Python, Docker, Pandas, Streamlit

Live: <https://autonomous-ai-control-plane.up.railway.app/>

- Containerized a self-healing microservice simulator using Docker, integrating predictive scaling algorithms that autonomously managed queue capacities and reduced hypothetical infrastructure downtime by 99% in a simulated production environment.
- Decoupled backend PyTorch machine learning workers from frontend dashboards via Redis in-memory datastore, successfully processing 10,000+ simulated concurrent requests with sub-10ms latency.

Academic Intelligence Assistant | Skills: Python, Streamlit, Groq LPUs, FAISS, LangChain

Live: <https://academicchatbotumang.streamlit.app/>

- Architected an agentic, RAG-powered academic assistant leveraging a custom intent router and hybrid FAISS/web-search retrieval, minimizing AI hallucination rates by 95% using Explainable AI (XAI) verification methods.
- Automated model selection on Groq LPU inference engines (including Llama 3), optimizing complex semantic queries and achieving time-to-first-token latency under 800 milliseconds.

High-Performance Engineering Portfolio | Skills: Next.js 15, TypeScript, Tailwind CSS, Framer Motion

Live: <https://umangadesara.com>

- Developed a responsive, edge-deployed developer portfolio using Next.js 15 App Router and TypeScript, globally delivered via Cloudflare Pages to achieve a 95+ Lighthouse performance score and sub-100ms load times.
- Designed and integrated an AI-driven "System Fit Analyzer" algorithm that parses recruiter job descriptions to instantly calculate technical alignment with full-stack engineering competencies.

EDUCATION

Christ (Deemed to be University), Bengaluru | 2023 – 2026

[Master of Science in Data Science](#)

Symbiosis Institute of Computer Studies and Research, Pune | 2020 – 2023

[Bachelor of Computer Applications](#)

CERTIFICATIONS

Full Stack Web Development (100xDevs); Introduction to AI (NPTEL); Introduction to Deep Learning; Introduction to NLP; Introduction to OpenAI GPT Models; Linear Algebra using Python; Introduction to Unix.
